

1974

"Christmas is coming! And it's the time for giving and forgiving..."

We send you our warmest greetings from beautiful Bunn Hill in New York State. We are here because Doron Precision Systems, Inc. has acquired the business of The Singer Company's Education Systems Operation in Binghamton. The product lines include: Link Driver-Trainer Equipment, Multi-Media Learning Systems and GPL Closed Circuit TV. Carl has done an outstanding job of presiding over all of this...and with the help of an especially talented and devoted group of employees and professional people, things are progressing well.

We truly miss our New England friends and relations...and it has been with great joy that we've been able to welcome some of you to visit with us here. Please make it a habit! We trust that more of you will come to brighten our days in '75.

We are happily making new friends among our neighbors and families within the company and also getting acquainted at church. (United Methodist)

We are living in a well-renovated but old house, built in 1871, which is nestled within about six acres of hilly terrain. We bought this one because it "felt so good" to be here. You'll have to come and see for yourselves to understand.

Donnie has adjusted well to country living plus a very structured program at school. In fact, he's quite challenged and doing better work than ever before. He's in after-school intramurals twice a week, and is also trying his hand at guitar. He's made many new friends and is a great help to his dad doing repairs around the house; but he's most proud of his ability to drive the tractor!

Ron resides in Acton, Mass. He's working full time on the night shift and carrying a full load of courses at Middlesex Community College. He teaches a class of fifth grade boys on Sunday mornings...and somehow squeezes in time to spend with a special little gal in West Boylston, Ma. Needless to say, he's causing us to "pop our buttons".

Our Karen is Karen Wenzinger, again. She is also living in Acton, and still working as a group secretary for a lot of Ph.D.'s at MIT's Lincoln Lab. She has many friends and projects and keeps quite active, socially. At present she is trying especially hard to improve her bowling score!

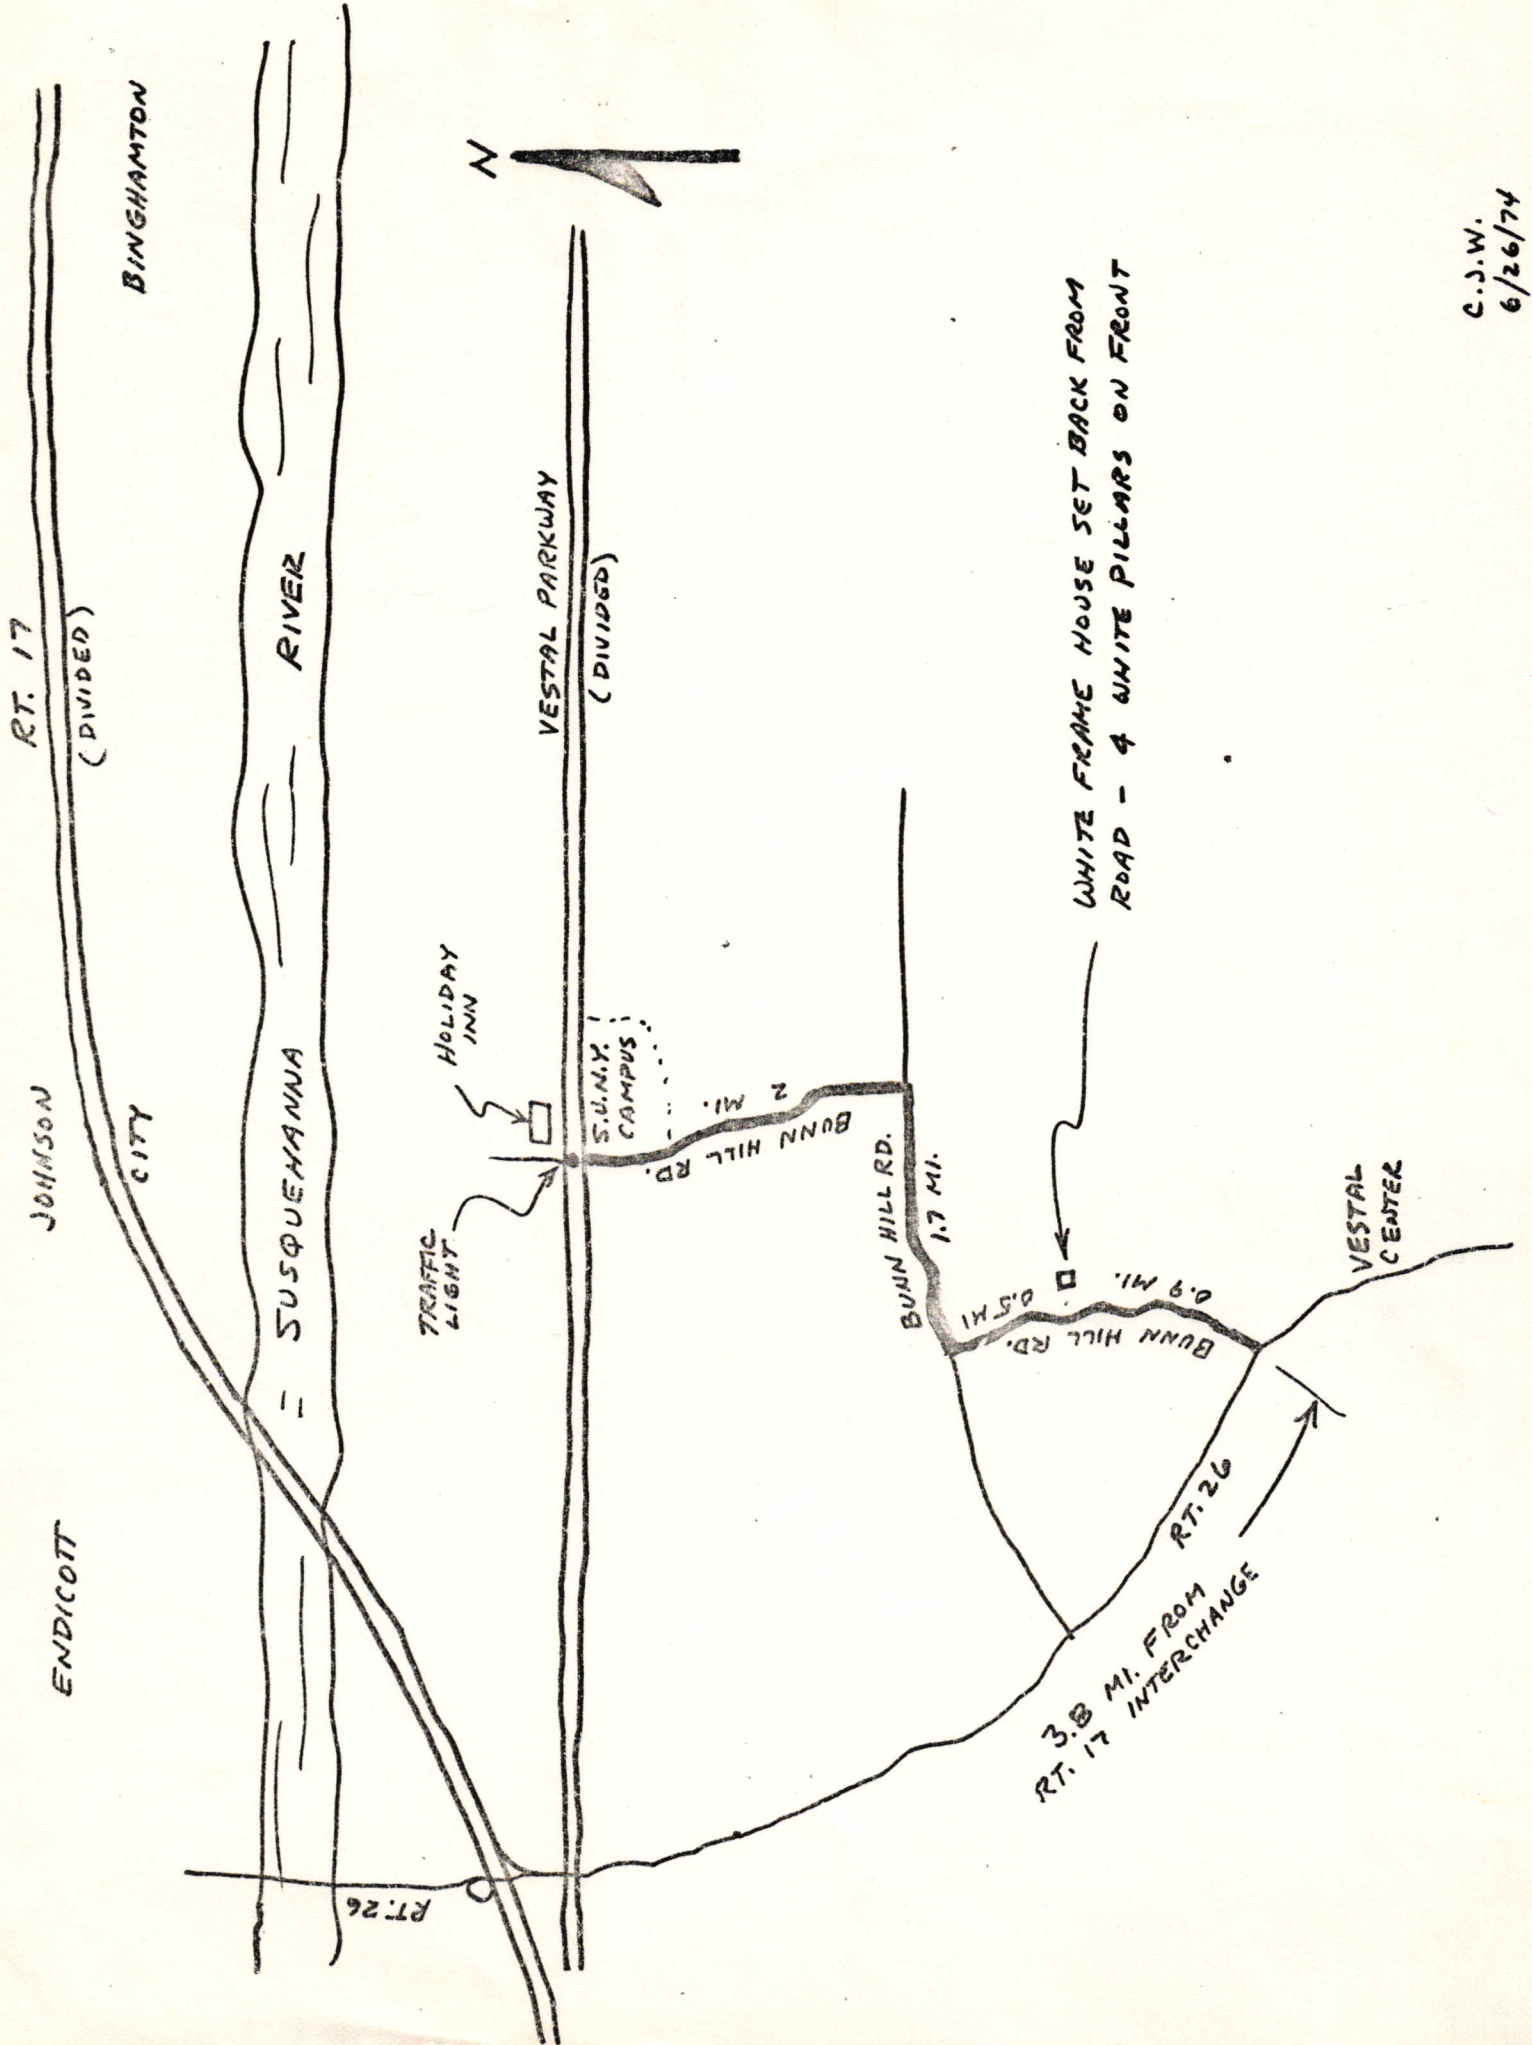

Leigh and Mike have moved to Vienna, Va. Leigh is teaching fourth grade at The Maret School on Cathedral Av. (D.C.)...a whole different ballgame from public school! Mike is attending American University School of Law. They are happily thriving on their busy and important tasks, as well as on their life together.

The best thing about kids is the older they get the NICER they become... and you'd better believe that we're really excited about ALL of them coming home for Christmas this year!

So..."Christmas is coming...Let the mistle toe appear above every head and kiss away our tears and make us huggers and lovers." R. Raines

We love you!

Dottie, Carl and Donnie
